

## MB Series Large Stage Screen

Diagonal : 350" — 400"

Format : 16 : 9 / 16 : 10

### Double positioning, double insurance

With in-built physical stroke counter, the upper limit and the lowest limit had been set by factory originally, no need to worry about any damages to the screen due to user's adjustment.

With the electronic encoder, user can set the up and down strokes at will easily. (optional accessory)

Physical stroke counter

Electronic encoder

### Multiple Control Options

RF / RS485 / Dry Contact Control (optional )

### Screen flat adjustment rod

In order to make the 400" screen fabric flat, the product has a screen flat adjustment rod. The fabric's V-shaped wrinkles can be effectively eliminated by adjusting the screen flat adjustment rod.

### Screen fabric

Use Germany 5 meters width screen fabric to avoid deforming under temperature and humidity changing. There are varied installation methods to meet any installation environment, like hanging mount, wall mount and ceiling mount.

### Screen Roller

With a 200mm diameter high-intensity roller and super standard straightness, ensuring that the 9m length roller falls no more than 5mm.

### High efficiency motor

With inbuild direct-current magnetic brakes system, the motor is durable and efficiently for long-term operation, ensuring security and safety.
